

Interior Finish Index

Decor: CYnergy

Generation: 1, 2, 3 & 5 - New Build & Renovation

Change Bulletin Issue Date: April 24, 2015

Interim Revision Date: December 31, 2014

Public/Guestroom/Back-of-House

General Notes

1. All finish indices are specific to hotel brand; décor scheme, building generation and building cycle. (i.e. new build vs. renovation)
2. If local codes exceed the requirements contained therein, the local codes must be used as the minimum standard.
3. Any numbers not shown are assumed not used.
4. The Location category will appear regimented in format starting from the generic to specific in regards to use of material. i.e. Guestroom - Whirlpool - Floor: Deck and Vertical Surfaces.
5. Updates to the finish index will occur quarterly at a minimum and will be issued as a Bulletin. Each Item in the Finish Index will include a revision date.
6. Any variation of finishes herein is to be submitted via the FFE/Interior Finish/Specification Variance Form located in the Interior Design Specification Manual. This form is to be submitted to Marriott's A&C department for approval 8 months prior to hotel opening for prototypical design and 10 months prior for custom design. Any deviation without approval is a potential violation of the franchise agreement and is subject to removal at owner's expense.
7. "Approved Substitutions" must comply with the General Conditions, the Bidding Procedures, and the intent of the various Specification Sections.
8. Finishes listed within index occur in other building documentation. Coordinate finishes with other documents to mitigate duplication.
9. Product Specification numbers are listed in parenthesis below the Material category of each finish. See brand specific Design Guide Project Manual Master for detailed instruction and purpose.
10. Many finishes have alternative manufacturers listed in the Design Guide Project Manual Master. Refer to the individual specification sections for approved manufacturers.
11. Control numbers (X-Ref) are listed where applicable and coordinate to Interior Design Specification Manual. See brand specific FFE manual for detailed information.
12. **Items shown BOLDED are items that have changed since the last revision.**
13. This Interior Finish Index meets the requirements of Marriott's LEED Volume Program (LVP). Any custom package or variations of finishes shall meet or exceed the recycled content of materials identified in this document. All carpet must be Green Label Plus certified, and all carpet padding must be Green Label certified in accordance with the Carpet and Rug Institute.
14. Finish Number Key: 100's = Floor Finishes 400's = Ceiling Finishes
 200's = Base Finishes 500's = Elevator Finishes
 300's = Wall Finishes
